

AF-10

PRODUCT DESCRIPTION:

Proprietary blend of amine salts

TYPICAL PROPERTIES:

Appearance	Hazy dark viscous liquid
Specific Gravity	.900 @ 77° F
Pour Point	-20° F
Flash Point (TCC)	142° F
Activity	70%

PRODUCT USES:

AF-10 is a concentrated base used to formulate products for preventing fouling of heat exchangers in refinery process streams.

APPLICATION:

AF-10 is normally diluted with a suitable solvent to yield a 25% to 35% solution. For crude preheat train, inject diluted AF-10 downstream of the desalter. Typical dosage is 25 ppm

HANDLING:

AF-10 is combustible. Care should be exercised in handling. Wear protective clothing and goggles. Observe the warning labels on drums.

AVAILABILITY:

AF-10 is available in drum or bulk quantities.
