

BC-186

PRODUCT DESCRIPTION:

Organophosphonic Acid Salt

TYPICAL PROPERTIES:

Appearance	Amber Liquid
Specific Gravity	1.397 @ 77° F
Flash Point	> 200° F
Activity	50 %
pH	8.0

PRODUCT USES:

BC-186 is a water-soluble corrosion inhibitor designed to prevent oxygen related corrosion in water base drilling muds, aerated drilling fluids and in mist or foam drilling applications.

APPLICATION:

For mist drilling, BC-186 should be diluted 3 to 4 times in water before being added to water during fluid makeup. Typical rates are 0.5 – 2 gal/10 bbl water in a mixing tank.

HANDLING:

Do not store near extreme heat or open flames. Care should be exercised in handling. Do not get in the eyes, or on the skin. For skin contact wash with soap and water. For eye contact, flush with water and consult a physical. Wear protective clothing including goggles and rubber gloves.

AVAILABILITY:

BC-186 is available in drum and bulk quantities.
