

## BC-505

### PRODUCT DESCRIPTION:

Neutralizing Amine Mixture

### TYPICAL PROPERTIES:

Physical Form	Liquid
Specific Gravity @77 °F	0.910
Pour Point	<-40 °F
Flash Point (TCC)	80 °F

### PRODUCT USES:

BC-505 is a neutralizing amine to assist in controlling the pH and acid corrosion due to HCl and H<sub>2</sub>S in refinery overhead condenser systems.

### APPLICATION:

BC-505 can be diluted in water or hydrocarbon. Typical use concentration is 25% to 40% activity.

### HANDLING:

BC-505 is flammable and corrosive. Care should be exercised in handling. Avoid breathing vapors. Wear protective goggles and clothing. Observe warning labels on drums.

### AVAILABILITY:

BC-505 is available in drum or bulk quantities
