

IC-154

PRODUCT DESCRIPTION:

Alkyl Benzyl Quaternary Ammonium Chloride

TYPICAL PROPERTIES:

Appearance	Dark Liquid
Activity	40%
Specific Gravity	1.046 @ 77° F
Density	8.72
Flash Point (TCC)	58° F

PRODUCT USES:

A corrosion inhibitor concentrate with biocidal properties that may be blended with other bases or diluted and used by itself. It is an excellent water-soluble corrosion inhibitor for producing oil wells, pipelines, packer fluids and waterfloods. It is an excellent wetting agent, surfactant and cleaner.

HANDLING:

IC-154 is a flammable product. It is corrosive to aluminum and admiralty metals and slightly corrosive to steel. It should be handled with stainless steel or proper coating materials. Avoid contact with skin, eyes and clothing. Flush affected areas with water. Do not take internally. Avoid discharging or washing spills in fresh water streams or lakes. Spills should be cleaned up with dry absorbent compounds and disposed of properly.

AVAILABILITY:

IC-154 is available in drum or bulk quantities.
