

ID-4558

PRODUCT DESCRIPTION:

Proprietary Mixture of Cationic Polyamines

TYPICAL PROPERTIES:

Physical Form	Gray Liquid
Specific Gravity	0.99 @ 60° F
Density Lbs/gal	8.39
Flash Point °F (TCC)	120° F

PRODUCT USES:

ID-4558 is a solution of selected cationic compound that is generally effective on all types of water clarification applications encountered in the production and transfer of produced fluids in the petroleum industry.

APPLICATIONS:

Typical treatment is 5 to 15 ppm although occasional systems may require levels outside this range.

HANDLING:

ID-4558 is combustible. Do not expose this product to extreme heat or open flame. Avoid contact with skin, eyes or clothing. For skin contact wash with soap and water. Avoid breathing fumes or vapors. Wear proper safety equipment including goggles, rubber gloves and protective clothing.

AVAILABILITY:

ID-4558 is available in drum or bulk quantities.
