

OBE-801

(Secondary Emulsifier)

PRODUCTION DESCRIPTION:

OBE-801 is an extremely efficient, highly concentrated emulsifier and wetting agent for invert emulsion muds.

TYPICAL PROPERTIES:

Appearance	Liquid
Specific Gravity	0.930 @ 77° F
Flash Point	112° F
Pour Point	5° F
Activity	100%

APPLICATION:

OBE-801 is a secondary oil mud-emulsifying agent used to emulsify water in hydrocarbon environments. OBE-801 is used to maintain a consistent emulsion after the initial use of OBE-800. A typical dilution is 30% to 50%.

HANDLING:

Use caution when handling OBE-801. Use of gloves is recommended along with protective clothing. Wear safety glasses at all times.

AVAILABILITY:

OBE-801 is available in bulk or drum quantities.
